

Funkienland

This website lists the registered (R) and unregistered (NR) German hosta cultivars. The terms originator (O), nominant (N), introducer (I) and registrant (R) are used for both according to the AHS definitions.

In some cases, the cultivars are the result of an international collaboration and could also be referred to as Dutch, English or Austrian hosta. The only reason why they appear in this list is the fact that one or more people involved were or are Germans, regardless of whether they live in Germany or neighboring countries. Therefore, these included cultivars could also be included in lists of Dutch, English or Austrian hostas.

It is intended to keep this list up to date. Therefore, any criticism, additions and suggestions are very welcome. Please write to the owner of the site:
